

Flagsource[®]

Features & Benefits

1. FlagSource is a fourth generation family owned and operated small business.
2. FlagSource flags can not be purchased in Big Box Stores.
3. Integrated manufacturing processes from Starfields to Shipping. FlagSource has full control!
4. FlagSource is smaller and more nimble.
We will help YOU get the advantage!

FlagSource[®]

Advantage

1. We bring your Brand to Life—private dealer branding available.
2. We embroider our own star fields in house—up to 20x38' both nylon and PolyExtra.
3. Our unidirectional chain stitch is the strongest stitch for horizontal seams in the market today. This stitch will flex and resist breaking for a longer period of time than other manufacturing techniques.
4. Our poly sateen heading is the whitest, strongest in the industry. On flags 15x25' and larger, we use webbing that is 3 times as strong as any seat belt.
5. Our X box is our history. We manufacture an exceptional quality flag—the correct size, expertly reinforced, and painstakingly sewn and inspected.
6. Experience the FlagSource Advantage and let us deliver Peace of Mind to you.

FlagSource®

Industry Affiliations

The Flag Manufacturers Association of America (FMAA) established the “Certified Made in the U.S.A.” certification program to ensure that American flags are homegrown with pride.

- I. All members of NIFDA will maintain high standards of ethical practice in the conduct of their business.
- II. Recognizing that the United States flag is the symbol of United States sovereignty, members, will strictly adhere to a policy of selling in the United States US flags that are "Made in the USA".
- III. When manufacturing flags, members will use only high quality domestic fabrics and threads, when available, and will maintain high standards of quality in the production process.
- IV. As leaders in our industry, members will strive to set an example for others through positive community involvement.
- V. Members will also treat customers, employees, business associates and other members with the utmost respect and consideration.

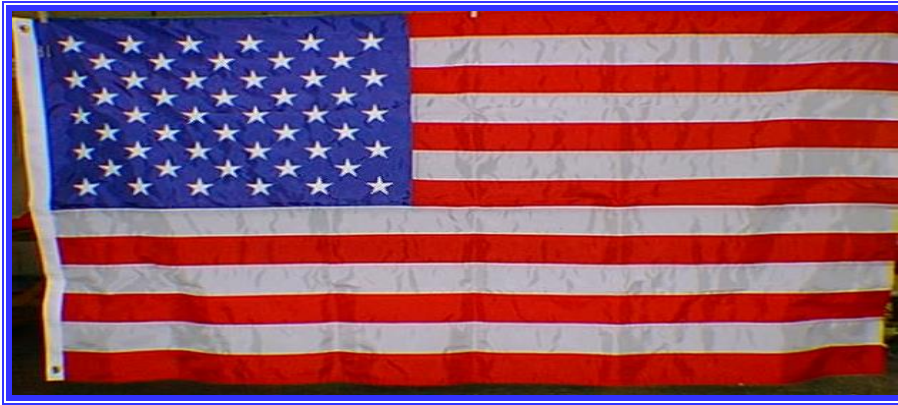

U.S Flag Overview

- FlagSource flags are meant to last. We use a combination of the highest quality components and state-of-the-art manufacturing to give you the best looking and most durable flags in the industry. All labor and material are certified Made in the U.S.A.
- Starfields are stitched by our state of the art Epoca Embroidery machine. FlagSource has gone to great lengths constructing the most attractive Starfields up to 20x38'.
- Construction begins with finest fabrics and color-matched threads available. We then carefully assemble each flag using a full ¼" turn on all seams, a unidirectional chain stitch for all horizontal seams (it makes the flag stronger), and a lock stitch for all edge hems.
- Fly hems are finished with 4 rows of lock stitching and a 102 stitch X-Box reinforcement at the top and bottom of flags up to 6x10'. Flags 8x12' and larger feature an X-box at each horizontal seam. Sizes 10x15' and larger have 6 rows of stitching on the flyend with double X-box reinforcement on every seam.
- And, for the strongest headings in the industry, we use a heavy nine ounce polyester sateen material.
